

Decision Report - PSL Michigan

Below is a review on some key decisions and regulations that were of relevance for PSL Michigan this past weekend on February 21, 2026.

#1 - Confusion on Solving Order

Match: Owen Stotts (3) vs Miles Reavis (4), timestamp 1:44:38

On set 2, solve 5, Miles finished his attempt with an 8.417s solve, winning the set by beating Owen 9.265s solve, who went first. Owen then began to solve set 3 solve 1.

After post-game review, it was determined that this was an incorrect procedure by game officials, and that Miles should have been first to solve in set 3.

#2 Inspection not properly communicated by referee

Match: Owen Stotts (3) vs Miles Reavis (4), timestamp 1:25:54

On set 1 solve 3, the referee failed to declare that 8 and 12 seconds of inspection had passed to Owen. The competitor voiced his concern to the referee, which triggered a discussion amongst game officials.

After review of the incident, it was determined that this incorrect solving procedure created issues with the integrity of solves. Therefore, the attempts were nullified and redone for solve 3. Since Miles already had a 8.501s solve for Owen to beat, that result was also nullified and redone.

Please feel free to read our [regulations update 1.1](#) for minor updates based on feedback from previous PSL events and decision reports.

Onwards,
Chai
